

SC700

SC700 is a 125 KHz proximity access control terminal incorporated with 3" TFT LCD. The color display and touch screen operation offer a user-friendly and easy menu management.

When connected with PC through Ethernet, SC700 is managed by ZKAccess 3.5 software. The software provides 2 applications, the access control and time attendance. It can also operate on standalone mode, and transfer data by USB flash drive.

The latest version of SC700 includes Wiegand Input port to connect external proximity reader and it can be used as a controller's external reader using Wiegand Out port. As a professional access control device, it allows time zones and groups, holiday managements, linkage, anti-passback functions etc.

SPECIFICATION

Firmware	PULL SDK
Display	3 Inches Touch Screen
ID Card Capacity	30,000
Logs Capacity	100,000
Communication	TCP/IP, USB Host
Standard Functions	ID card, Automatic Status Switch, T9 input, Multi-verification Method
Access Control Interface	3rd Party Electric Lock, Door Sensor, Exit Button, Alarm
Wiegand Interface	Wiegand input & output
Optional Functions	Mifare Card
Power Supply	12V/3A
Operating Temperature	0°C - 45°C
Operating Humidity	20% - 80%
Dimensions (H×W×D)	160×104.7×36mm
